CATALOG

Where Product Strategy Becomes Operational

Catalog is Valient's centralized product data and document management layer for industrial distribution. It aggregates supplier documents, product specifications, pricing, and inventory signals into a single, governed source of truth.

Synchronized Source of Truth

Your systems, always in sync.

Catalog synchronizes product information with your systems of record (ERP, CRM, and internal tools), replacing fragmented datasheets, disconnected document repositories, and inconsistent product definitions with a structured, version-controlled catalog.

ERP/CRM Sync · Version Control · Document Management · Data Governance

Operationalized Across Teams

From data to decisions, faster.

Product data is continuously enriched, traceable to source documents, and operationalized across sales, product, and technical teams — enabling faster decisions and more consistent execution.

Team Collaboration · Continuous Enrichment · Traceability · Faster Decisions

CATALOG CAPABILITIES

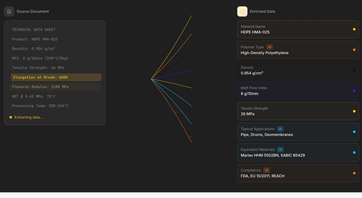
Leverage Your Material Data

From intelligent data extraction to seamless integrations — discover how Catalog transforms how you manage and leverage material information.

INTELLIGENT EXTRACTION

Material Data Extracted & Enriched

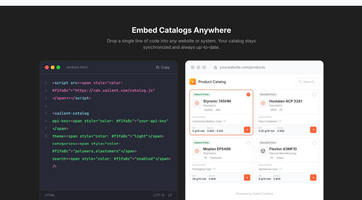
Upload TDS, SDS, or spec sheets. AI extracts structured data and enriches it with applications, equivalents, and compliance information.



NATURAL LANGUAGE INTERFACE

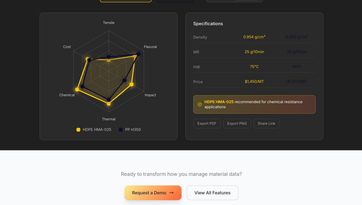
Query Materials via Prompt

Ask technical questions in plain language. Get instant, accurate answers from your entire material database.



Embed Catalogs Anywhere

Drop a single line of code into any website or system. Your catalog stays synchronized and always up-to-date.



VISUAL ANALYSIS

Compare Materials & Generate Charts

Instantly compare material properties side-by-side. Generate radar charts, bar comparisons, and exportable diagrams.

Built for Your Entire Commercial Team

For Account Managers · For Product Directors · For Technical Directors

Work from one source of truth.

Catalog gives Account Managers clear visibility into approved products, specifications, pricing, and availability. This reduces confusion, speeds up customer responses, and ensures offers are aligned with current portfolio, pricing, and inventory guidance.

- **Clear product visibility** — See approved products, specifications, pricing, and availability in one place.
- **Faster customer responses** — No more hunting through files or asking colleagues for the right spec sheet.
- **Aligned offers** — Ensure every offer matches current portfolio, pricing, and inventory guidance.
- **Reduced confusion** — Eliminate uncertainty about which products to sell and at what price.

Complete Material Intelligence

Catalog transforms scattered product documentation into an intelligent, searchable knowledge base.

Automated Document Parsing & Indexing

Upload TDS, SDS, and product specs once. Catalog automatically parses, indexes, and makes them searchable across your organization.

Approval Workflows & Version Control

Ensure only approved, up-to-date documents are accessible. Track every version change with complete audit trails.

Compliance-Safe Document Access

Sellers only see approved documents. Eliminate the risk of sharing outdated specs, non-compliant data sheets, or incorrect formulations.

AI-Powered Product Suggestions

Based on customer applications, machinery, and past purchases, Catalog suggests the right products automatically.

Application-Based Matching

Match products to specific customer applications. Know exactly which materials work for which use cases.

Organization-Wide Knowledge Diffusion

Deep material knowledge isn't locked in experts' heads. Catalog makes institutional knowledge accessible to everyone.

There's A New Way to Manage Materials
