

CATALOG

Where Product Strategy Becomes Operational

Catalog is Vailent's centralized product data and document management layer for industrial distribution. It aggregates supplier documents, product specifications, pricing, and inventory signals into a single, governed source of truth.

[Request a Demo](#)[See Features](#)

Synchronized Source of Truth

Your systems, always in sync.

Catalog synchronizes product information with your systems of record (ERP, CRM, and internal tools), replacing fragmented datasheets, disconnected document repositories, and inconsistent product definitions with a structured, version-controlled catalog.

Operationalized Across Teams

From data to decisions, faster.

Product data is continuously enriched, traceable to source documents, and operationalized across sales, product, and technical teams — enabling faster decisions and more consistent execution.

CATALOG CAPABILITIES

Leverage Your Material Data

From intelligent data extraction to seamless integrations — discover how Catalog transforms how you manage and leverage material information.

INTELLIGENT EXTRACTION

Material Data Extracted & Enriched

Upload TDS, SDS, or spec sheets. AI extracts structured data and enriches it with applications, equivalents, and compliance information.

Enriched Data

NATURAL LANGUAGE INTERFACE

Query Materials via Prompt

Ask technical questions in plain language. Get instant, accurate answers from your entire material database.

Catalog AI

Connected to 12,450 materials

• Online

Which HDPE grades are suitable for pressure pipe applications?

For pressure pipe (PE100), I found **4 grades** meeting ISO 4427 requirements:

- Hostalen ACP 6541 - MFI: 0.25 g/10min, Density: 0

Ask about materials, specs, suppliers, compliance...

Find PE100 pipe grades

Get IPA safety data

Compare PP impact strength

Embed Catalogs Anywhere

Drop a single line of code into any website or system. Your catalog stays synchronized and always up-to-date.
